OBJECTIVE

Aspiring software developer and recent Computer Science graduate with a robust foundation in programming and a keen proficiency in Python and web technologies. Equipped with hands-on experience in data structures and algorithms through rigorous coursework, I am well-prepared for real-world coding challenges. Eager to leverage my skills in an entry-level position to contribute to innovative software solutions, gain valuable industry experience, and grow under the mentorship of seasoned professionals.

EDUCATION

•Bachelor of Technology in Computer Science and Business Systems

Nov 21- July 25

CGPA: 8.04

R.V.R. & J.C College of Engineering

Personal Projects

•Basic Weather app

Developed a comprehensive web application to revolutionize travel planning.

- Utilized advanced algorithms to curate personalized itineraries based on user preferences and location data. Integrated real-time updates, user reviews, and a user-friendly interface to enhance the overall travel experience. Successfully delivered a platform that empowers users to discover both popular and hidden gems at their desired destinations.
- Technology Used : HTML , CSS , JavaScript.

Internship

•AWS Cloud Virtual Internship

Apr 2024 - June 2024

AICTE-Eduskills Online

- In-depth understanding of AWS cloud computing services, including EC2, S3, RDS, Lambda, IAM, VPC, and more.
- Proficient in designing, deploying, and managing fault-tolerant, highly available, and scalable AWS solutions.
- Strong knowledge of architectural best practices, such as AWS Well-Architected Framework, security, performance, and cost optimization.
- Hands-on experience in cloud infrastructure provisioning, monitoring, and automation using AWS Management Console and AWS CLI.

•Intelligent Automation Virtual Internship

Sept 2023 - Nov 2023

Blueprism

Online

- Designed and implemented intelligent automation solutions using RPA (Robotic Process Automation) tools to streamline repetitive tasks and improve operational efficiency.
- Applied AI and machine learning techniques to enhance automation processes, including natural language processing and predictive analytics, to address complex business challenges.

TECHNICAL SKILLS AND INTERESTS

Languages: C, Python, Javascript, HTML, CSS

Web Dev Tools: VScode, Git, Github Databases: Relational Database(mySql)

Relevent Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database

Management System, Real-World Problem Solving. **Areas of Interest**: Web Design and Development

Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

CREDENTIALS

•Expert Java from FutureSkills

Oct - Dec 2022

•Data Analytics From AICTE

Oct - Dec 2022
